

# TROVE LNG

## Liquified Natural Gas KnowledgeBase

TROVE LNG is a global database covering hundreds of projects globally. Data is captured on operational and planned LNG terminals and infrastructure.

### Includes:

- Detailed data for over 300 LNG projects.
- Information on project aims and scope, commercial status, capacities and location.
- Powerful filtering and analysis tools.
- Our extensive collection of unstructured data with audit trail back to source materials.

### TROVE LNG provides:

- A database of LNG projects worldwide from R&D through to fully operational projects.
- Details of the project including infrastructure, technology and operator.
- Rapid project comparison.
- Regional overview in the global context.
